USA: Probiotic supplements in e-commerce

With 46% share, the United States is already the leading probiotic supplement e-commerce market globally, based on the research of 20 key countries, and this only looks set to grow as public interest in the benefits of a healthy microbiome for immune health increases, and online shopping in general surges. As part of our new series of country fact sheets, this report looks at the drivers of the well-established probiotic supplements e-commerce marketplace in the US.

Did you know?

- E-commerce is the place of growth for American probiotic supplements, with consumer engagement rising by 34% in the first half of 2020 to reach 307 thousand reviews (July 2020).
- While talk of pill fatigue has been ongoing for several years in the US, capsules are still the most popular format for probiotics in the US market. Capsules are used in 64% of products, but command 78% of all reviews.
- Probiotic supplements continue to be affordable within the US, with the average price at US\$28 per pack.

PROBIOTIC SUPPLEMENTS BY HEALTH BENEFIT (3)

ON AVERAGE IN JULY 2020

The largest average (per product) number of reviews (**67**) was recorded by probiotic supplements supporting Antibiotic Recovery. The corresponding star rating was **4.95** out of 5.

The smallest number of reviews ($\mathbf{0}$) was recorded by an average probiotic supporting Cardiovascular Health.

Note: The red dotted lines show the average star rating and average number of reviews.

PROBIOTIC SUPPLEMENTS BY HEALTH BENEFIT (4)

PRICE TO SATISFACTION, JULY 2020

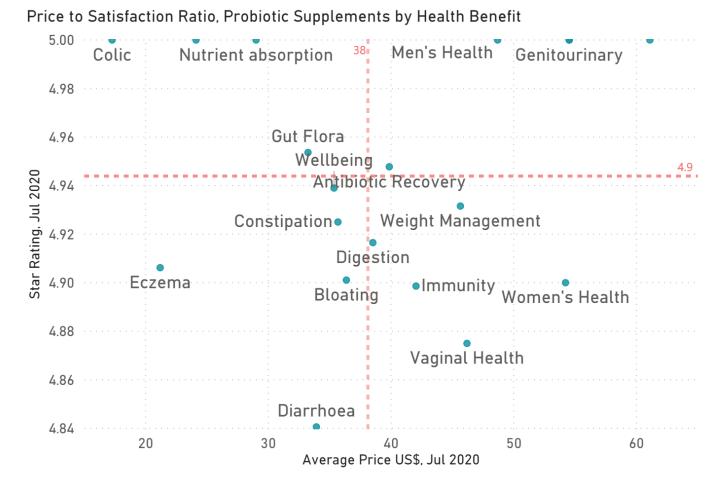

With an average price of US\$ **61** per pack, the highest priced was an average probiotic forGut-Brain Consumer satisfaction expressed as the average star rating was **5.00** out of 5.

The lowest priced was an average probiotic for Colic, priced at US\$ 17.

The next pages will zoom in on three key health benefits: digestion, immunity and women's health.

Lumina will analyse the e-commerce space by the number of reviews acquired by companies (brand owners and suppliers), brands and products.

We'll also map out species and proprietary strains present in probiotic supplements that claim to support these health benefits. Note that some products may claim to support more than one health benefit, therefore whilst present in products, not all listed species and strains may exclusively support digestion, immunity and women's health.

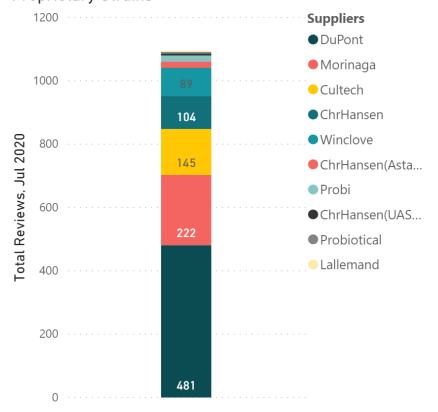

Note: The red dotted lines show the average star rating and average price.

LUMINA INTELLIGENCE - METHODOLOGY

25 researched countries

Australia * China * India * Indonesia * Japan * Malaysia * South Korea * Taiwan * Thailand * Vietnam * United States * Canada * Brazil * Mexico * Belgium * Finland * France * Germany * Italy * Poland * Russia * Spain * Sweden * United Kingdom * South Africa

 Covering 25 strategic countries, Lumina Intelligence collects and analyses product information of the best-selling brands in the online space across the following categories in Probiotics:

Probiotics
Probiotic supplements
Probiotic juice
Probiotic cosmetics
Kombucha

- Lumina Intelligence evaluates consumer response to these products, as it tracks local customer reviews and star rankings across leading online retailers in each country.
- Captured product information includes granular ingredient profiles, dosage, target population, health benefits and product formats, flavours, origin and social labels such as free-from and clean label.
- We track products back to the supplier when a proprietary ingredient is listed on the label.

Lumina Intelligence

ABOUT LUMINA INTELLIGENCE

Lumina Intelligence is a unique insights service covering the probiotics markets. We focus exclusively on the e-commerce retail channel.

Through the analyses of post-purchase reviews by customers across leading online retailers; and the detailed ingredient data and product labelling data (including format, dosages and health claims), Lumina supports you in delivering a winning NPD strategy by identifying the niche areas to succeed and by providing data for your e-commerce strategy.

Why Reviews: Acting as a digitised word-of-mouth, reviews are the new digital currency for measuring consumer engagement and sentiment. Online post-purchase reviews increasingly influence purchasing decisions and allow consumers to research the efficacy of products and whether they bring the health benefits the products claim to other users.

Lumina Intelligence uses this data to support your understanding of how consumers feel about the products they have purchased and how engaged they are with brands.

Subscription to the service is on an annual basis, price dependent on number of users.

Our reports are available to purchase individually. Training and support is provided.

All reports are available to purchase quickly and easily online. Full details can be found at https://www.lumina-intelligence.com/reports-probiotics/.

Our full range of country reports for Asia: Available to buy online

China: Probiotic supplements in e-commerce

China is a hotbed of probiotics activity, with the country propelling the category's growth across Asia. It accounts for 3 million online reviews – the largest in the world – with the vast majority of them overwhelmingly positive, averaging at 4.86 starts out of 5.

In this special report we detail the most popular products, brands, suppliers, strains and species in terms of online engagement and look at the target populations and health conditions that are driving engagement.

USA: Probiotic supplements in e-commerce

With 46% share, the United States is already the leading probiotic supplement e-commerce market globally, based on the research of 20 key countries, and this only looks set to grow as public interest in the benefits of a healthy microbiome for immune health increases, and online shopping in general surges. As part of our new series of country fact sheets, this report looks at the drivers of the well-established probiotic supplements e-commerce marketplace in the US.

Did you know?

- E-commerce is the place of growth for American probiotic supplements, with consumer engagement rising by 34% in the first half of 2020 to reach 307 thousand reviews (July 2020).
- While talk of pill fatigue has been ongoing for several years in the US, capsules are still the most popular format for probiotics in the US market. Capsules are used in 64% of products, but command 78% of all reviews.
- Probiotic supplements continue to be affordable within the US, with the average price at US\$28 per pack.
